LETTER OF RECOMMENDATION

I, **Dr. ABHISHEK M R**, Associate Professor, Department of Mechanical Engineering, glad to recommend **Mr. Darshan Gowda K M**, for admission to Master's Degree in your esteemed University.

Mr. Darshan Gowda K M, had been a student of Mechanical Engineering and successfully passed the degree out of hard work and sincere efforts. During the years he studied in our institution, I have taught him subjects like Mechanics of Materials, Kinematics of Machines in the second year (3rd and 4th semesters) and Design Laboratory in final year. During my lectures, I observed that he paid due attention to details. He is intellectual, curious and yearns to gain in-depth knowledge. He is a person with a positive attitude and is always punctual. He would interact with everyone in his class. He is very precise person who is extremely articulate with his words. I have seen him put in dedicated effort and toil endlessly along his peers in making them project something interesting and application oriented. He has also shown his adeptness at organizational skills especially in a course-cultural setting.

Not just academics, Darshan Gowda is equally good and participates actively in co-curricular and extra-curricular activities. On an interpersonal side, Darshan Gowda has maintained a good relationship with both his peers and faculty members. The best example is he's also a member of KSSEM idea club organizing committee who had organised & participated in the seminar on their project works. He not only participated in it but also made students aware about it. His advice had been great help to students. Besides this, he was a part of mega ATV championship and had secured AIR II which is pride to the institution.

Hence, strongly feel that he must be given an opportunity to pursue his Master's study at your university. Please feel free to contact me if you have any questions.

Dr. ABHISHEK M R
