To whom so ever it concerns,

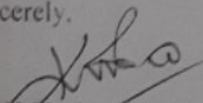

I am writing this letter of recommendation for Sean Kevin S in support of his application to the master's program at your respected university. I have known Sean for over a year as the Head of the Department in the Department of Computer Science and Engineering at our college. I had the pleasure of working closely with Sean through his final year project along with being a member of the Google Developers Student Club under my guidance. Sean struck me as a hardworking, passionate student who was determined to succeed in his career.

Sean is an amiable leader who collaborates with others with ease. During his project, he oversaw a team of four people, and his enthusiasm, self-assurance, and genuineness inspired the others. His acute observational abilities allowed him to assign duties, understand difficulties with ease, and foster an environment of growth and productivity. In order to create the optimal strategy, he welcomed various ideas and inputs while managing multiple duties at once. He was a student who could take on various responsibilities at once and still manage everything by balancing his time and not being stress-free.

Additionally, Sean is a persuasive speaker who can convey and influence various other students through his ideas. His talks on various topics of advanced technologies were thorough and participatory. He conveyed the complex subtleties of the subject without losing sight of the wider picture by including an intuitive and visually appealing user interface. He conducted in-depth research and provided well-organized, insightful answers to follow-up queries. In addition to his academic pursuits, he led some of the top technical events on campus and took part in a variety of activities from the technical club during the annual college fest. He is a motivated learner who can manage his time well to take advantage of any chance. He also has a disciplined mentality.

All things considered, Sean is a kind, thoughtful individual who has the utmost respect for everyone around him. He is driven and ambitious in achieving his goals. Because he is committed to building a career in the field, he perseveres in the face of challenges. I have no difficulty in recommending that you accept his application because of the many reasons I believe he would be a great addition to your program.

Sincerely,

Dr. K Venkata Rao,

Head of the Department,

Department of Computer Science and Engineering,

K S School of Engineering and Management, Bangalore, India.

## LETTER OF RECOMMENDATION

As the Associate Professor of Computer Science and Engineering Department, It gives me great pleasure to write this recommendation letter for **Mr. Dhanush Rasineni**. I have known him for the four years from the time he enrolled for his undergraduate degree in K S School of Engineering and Management. I have been his course mentor for the subjects Object Oriented Programming, Computer Networks and as such have known him well. During his course of study in this Institution, I had the Opportunity to observe and appreciate his academic caliber, as well as the versatility of his personality.

**Mr. Dhanush** has distinguished himself as one of the good students in the class. He was an active and diligent class participant and brought together an Engineer's analytical approach, a keen understanding of fundamental realities combined with mathematical knowledge, which he applies efficiently to problem solving. He has always exhibited fecundity of mind. He is a passionate student and likes to go past the hypothetical domain, to practical applications of his subjects and his perseverance enabled him to achieve his goals in the laboratory sessions and industrial visits.

He has involved himself in numerous organizations both on campus and outside. Moreover, he implemented the Weather Forecast system which fused three different disciplines involving HTML/CSS, and MySQL. His project stood as one of the best projects in the semester.

In a nutshell, Dhanush is a multifaceted person with a zeal for academic, cultural and extra-curricular activities. I am confident that your esteemed university will be an ideal place for him to improve upon his existing skills through pursuing a Master's Program. I strongly recommend him for admission to the graduate program with financial Assistance.
