World Diabetes Day provides an opportunity to raise awareness of diabetes as a global public health issue and what needs to be done, collectively and individually, for better prevention, diagnosis and management of the condition. WHO's World Diabetes Day activities will cover issues ranging from championing the priorities of people living with diabetes in advocacy to the Global Diabetes Compact, which drives efforts globally to reduce the risk of diabetes and ensure access to treatment and care.

Diabetes is a disorder in which the body fails to process and utilize the glucose which is produced from the food we consume. There are mainly three types of diabetes mellitus - Type 1 diabetes, Type 2 diabetes and Gestational diabetes. Glucose is the leading source of energy in the body. Inefficient assimilation of glucose can hamper one's day-to-day activity, and unmanaged diabetes could lead to fatal complications like cardiovascular issues, nerve damage, kidney damage, foot damage, skin infections, erectile dysfunction, depression, dental problems the vision to make India a developed nation by 2047, the 100th year of independence. The vision encompasses various aspects of development, including economic growth, social progress, environmental sustainability, and good governance.
